

Hello,

Below you will find the latest ETNA Service Bulletin. Everything you need to know about software version 2.02 for the Dorado, Tucana and Lyra machines, which will be installed as factory defaults from week 3, 2019 onwards (machines starting from serial number 1J03XXX). From this moment this software is available on our dealer portal

Dealer-login

Software version 2.02 no longer makes a distinction between membrane, capacity and Smart Touch machines. Below you can find an overview of the changes in the new software with respect to version 1.01 that has been in use since March 2018. For a number of changes there will be an explanation of how the change works and how it can be configured.

The main changes in software version 2.02 are:

- Service codes have been changed;
- Faster menu navigation, especially noticeable for Smart Touch machines;
- Screen for configuring the number of cups in a pitcher for a Smart Touch machine;
- Position of beverages on Smart Touch machines can be moved;
- Screen on Smart Touch machines returns to the first screen after 30 seconds of inactivity;
- Screen on Smart Touch machines returns to the first screen after preparing beverage;
- Factory Back-up is automatically created after a software update when booting with #;
- Screen lock with ETNA logo added to all machines;
- Adding own logo below the ETNA logo when booting or on screen lock on Smart Touch machines;

Download the PDF with all changes accompanied by an explanation.

Should you have any questions regarding the above, then feel free to contact Ron van Leest via (+31)(0)314 442 333 or technicalsupport@etna-ct.com.
