

ENERGY RATING ETNA DORADO INSTANT MEDIUM AND LARGE

ENERGY RATING COFFEE MACHINES

ETNA follows the energy protocol of the EVA (European Vending Association) and strives to achieve the highest possible energy rating.

We achieve this by equipping all ETNA coffee machines with an adjustable Energy Saving Mode, resulting in significant energy savings over their lifespan. Additionally, our open boilers, particularly those used in instant and fresh brew coffee machines, are well-insulated, minimizing heat loss.

Machine has rating A conform het EVA Energy Measurement Protocol versie 3.1B.
Machine has rating A at 15 liters/24 hours and consumes 1570 wh/24 hours in Idle mode.
