80 OVERVIEW
COFFEE MACHINES

WHY CHOOSE AN **ETNA** COFFEE MACHINE?

- You want to serve delicious coffee
- You are looking for a reliable machine that will last
- You want an affordable machine
- You want a coffee machine that is easy to use
- You want a machine that suits a conscious, sustainable business

Read on
p.54
how **ETNA**
chooses
sustainability

Your
interests
are central
in our
daily
choices

- Robust technology for consistent quality, the best taste and optimal ease of use
- Craftsmanship and robust components for long life and low service costs
- Minimal energy consumption: of our coffee machines and in our production
- Made in Holland
- 8-year manufacturer's warranty on the Braumann brewer and the Braumann grinder

SIMPLY UNSTOPPABLE

HOW TO CHOOSE YOUR COFFEE MACHINE

You want to offer your guests and employees the best coffee every day. ETNA has the same goals. In this catalogue you will find our range of professional ETNA coffee machines. Each of them is of top quality with an affordable price, specially designed for businesses and catering establishments. Finding your best choice is easy, especially with the selection guide on pages 10-11. Determine the number of employees or guests you want to serve tasty coffee to day after day, your requirements regarding speed, convenience and how much variety you want to offer. The result is a coffee machine that perfectly meets the needs of your business and exceeds the expectations of your guests or employees.

TASTE AND PREPARATION TIME

The first choice is the most important. Do you want an intense coffee taste and opt for an espresso machine with freshly ground beans and fresh milk? Or do you want to offer your employees a delicious cup of coffee or cappuccino within seconds and therefore choose the speed of instant? No matter where your priority lies, with an ETNA coffee machine you can be sure that you will always pour out flavourful coffee. An absolute must for the experience of job satisfaction and hospitality.

*Good coffee
is a token
of appreciation*

SMART OPTIONS IN ABUNDANCE

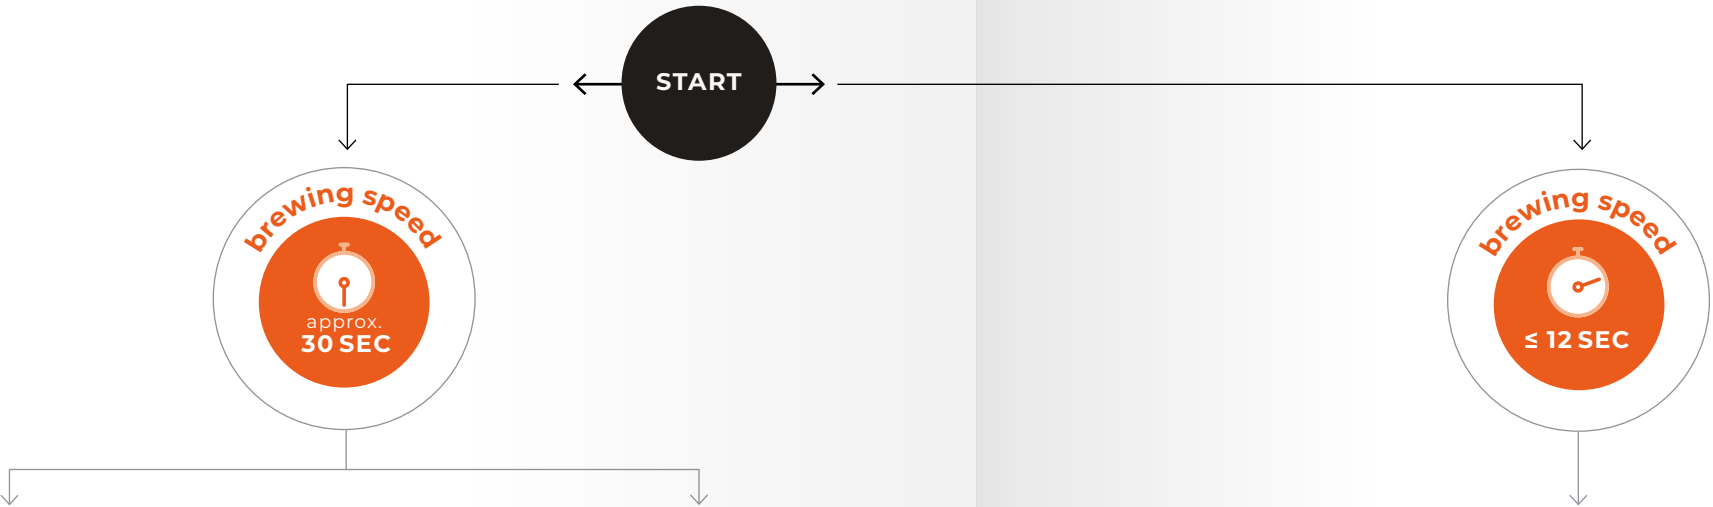

Espresso, latte macchiato, cappuccino or latte; made with powdered milk or fresh milk? Pure tea water, hot chocolate: anything goes. You decide how much variety to offer your employees or guests. Moreover, it is possible to personalise the look of your coffee machine (p. 34) and there are useful accessories (p. 66) for even more features and convenience. Do you have additional requirements after purchase? Often, expansion is not a problem.

*Good
coffee
makes people
feel
appreciated*

ETNA MUNDO: buttons • economy line

SWISS CRAFTSMANSHIP

Unique to ETNA coffee machines: **THE BRAUMANN BREWER**

We manage the best coffee technique with our own reliable espresso brew system: the Braumann brewer. Developed specifically for ETNA by the Swiss developer Jorg Braumann. Globally unique.

The Braumann brewer is the heart of each medium and large espresso machine. It's here that the freshly ground coffee converges with the hot water in perfectly balanced proportions, with the right pressure and temperature.

This unparalleled, sound brewer is positioned in a robust metal housing unit capable of bearing the pressure of the brewing process.

The brewing unit and grinder are the heart of every whole bean espresso machine and are determinative for the reliability of the machine and the incup quality of the coffee. With an 8-year manufacturer's warranty on the Braumann brewer and the Braumann grinder, the technical risk on these crucial components is minimized.

Your benefits of an 8-year warranty on the Braumann brewer and Braumann grinder:

- Long lifespan guaranteed
- Low service costs
- A sustainable solution

ETNA's technicians have the knowledge and experience and select the best components and materials. Combined with our drive for innovation and perfection, our craftsmanship results in reliable coffee machines that brew the perfect cup of coffee time and time again. Simply Unstoppable.

*As perfect and
reliable as Swiss
clockwork*

SMART TECHNOLOGY

Extra convenience thanks to smart features

Good coffee depends on more than the right coffee bean. That is why we have equipped our machines with SmartFlow: a high-quality rotary pump with flow meter. It ensures optimal, constant water pressure, precise water dosing, a quiet machine and - most importantly! - the perfect coffee. Extra advantage: this rotation pump lasts much longer than a vibration pump. In short, constant quality in all areas.

SmartFlow

This exclusive touchscreen (of 10" or 7") features 3 mm thick safety glass. This protects the display and extends its life, is scratch-resistant and easy to clean. You can customise the drinks menu, coffee recipes, logo and language. So you have complete freedom to configure the machine entirely to your liking, including your own beverage names.

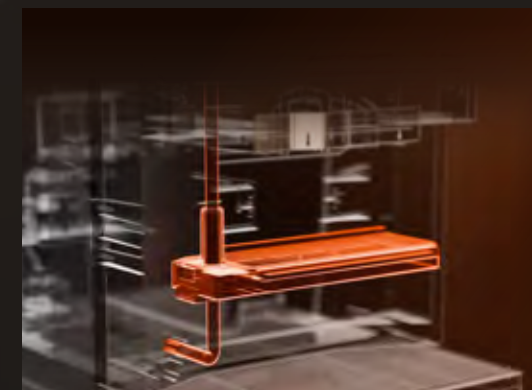

SmartTouch

The two cup sensors and the intelligent dispensing lighting (finished in LED) guide the user so that they know where to place the cup. Is something wrong with the machine? Even then the lighting clearly indicates this. So the user always knows exactly what to do for a delicious cup of coffee. Moreover, the cup sensors ensure that no dispensing is possible without a cup. So never lose a cup again.

SmartSense

The robust, height-adjustable and patented rotating cup tray has several advantages. It makes it easy to use - very sustainably! - to use your own cups. Any mug, cup or glass fits under the spout, so no splashing. Tall glasses also fit, for coffee variations such as latte macchiato. And because you can place the cup directly under the spout, there are fewer air bubbles in the coffee, which is better for the quality. Moreover, the cup tray can be turned away to fit a jug underneath: ideal for taking more coffee in one go.

SmartFlex

Thanks to the patented closure of the ingredient containers, you avoid any mess with beans or toppings. As soon as you close the machine door, the ingredient container is automatically sealed. You don't need to do anything extra for this.

SmartLock

Next: ETNA Sagitta

ETNA SAGITTA ESPRESSO

MAKE COFFEE LIKE A BARISTA

A beautiful design and compact size, 10" SmartTouch Screen with your own logo or message, stainless steel grid and many useful features. Proven technology and high-quality components. Available in Noble bronze and Anthracite grey colours. That is the new ETNA Sagitta espresso machine.

The ETNA Sagitta offers your guests or employees the ultimate coffee experience. Perfect for wherever reliable quality and beautiful design are the standard, such as a buffet room, restaurant, or stylish office. Used in combination with the ETNA Sagitta MilkBase, you will also be assured of consistent quality milk foam at the touch of a button. Extend the ultimate taste experience by serving the coffee in a pre-heated cup.

FEATURES ETNA SAGITTA LINE

- **The Braumann brewer and grinder:** pre-heated metal, Swiss quality brew group, 7,5-17 grams with 8-years warranty
- **SmartFlow** - High-quality rotary pump with flow meter.

ETNA SAGITTA ESPRESSO

YOUR TOTAL SOLUTION FOR
HOSPITALITY & OFFICE ENVIRONMENTS

SAGITTA

ETNA Sagitta can be tailored to the user's requirements. With one or two bean containers and grinders, and with none, one or two instant containers. Depending on the required range of beverages, ETNA Sagitta can be used with or without ETNA MilkBase for fresh milk.

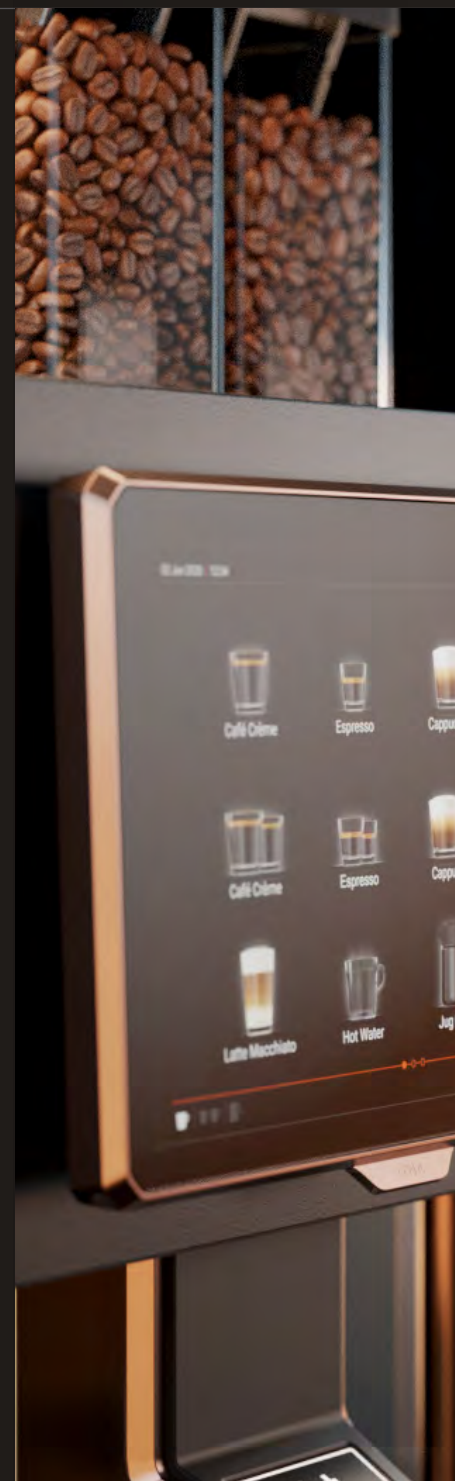

You want to be able to work quickly, especially in the catering industry. The height-adjustable spout can be manually adjusted as required. Then simply select the desired drink and let the machine do the rest. All the heat stays in the cup, without splashing. In short: optimum in-cup quality.

ETNA DORADO ESPRESSO COMPACT

ELEGANT UNDER ANY KITCHEN CABINET

3 DESIGNS:

COMPACT BASIC COMPACT TOUCH 7" COMPACT PREMIUM 10"

Even when space is limited, you want to serve delicious coffee from a stylish machine. The ETNA Dorado Espresso Compact was developed especially for this purpose. With its height of only 52 cm, this espresso machine fits perfectly in kitchens with upper cabinets, in meeting rooms and showrooms, small offices and pantries.

Its capacity serves about 15 employees or 75 hot beverages per day. Without any effort and in just over 30 seconds, your guests or employees will be drinking a delicious espresso, cappuccino or latte with fresh milk foam or topping, pure tea or hot chocolate. The ETNA Dorado Espresso Compact is available in three standard versions.

ETNA DORADO ESPRESSO MEDIUM

UNPARALLELED IN VERSATILITY AND QUALITY

3 DESIGNS:

MEDIUM BASIC

MEDIUM TOUCH 7"

MEDIUM PREMIUM 10"

For years it has been the best-selling machine in our range: the ETNA Dorado Espresso Medium. And not without reason. The Braumann brewer and bean grinder make it an extremely reliable machine that delivers on our promise of "Simply Unstoppable" with gusto. Cup after cup, year after year, the coffee quality is consistently high. This coffee machine is specially designed for a wide range of applications. You'll see it in stylish offices, high-service tank shops, manufacturing locations, hotels and coffee-to-go stores. Do you have about 50 employees or serve about 250 varied hot drinks a day? Chances are this is the top choice for your business. Because with the many options, you can easily put together your ideal coffee machine.

○ ● ● RAPID COFFEE BREWING EVEN AT HIGH DEMAND WITH THE DOUBLE HEAD

ETNA DORADO ESPRESSO LARGE

FOR GREAT PERFORMANCE

2 DESIGNS:

LARGE TOUCH 7" LARGE PREMIUM 10"

No matter how much coffee is consumed in your business each day; every cup should have the same, delicious taste. Your employees appreciate that and your guests should expect it. And, of course, they want to be able to choose their own variety of coffee. Do you have more than 50 employees or serve about 250 hot drinks a day? Then the ETNA Dorado Espresso Large may be a good choice.

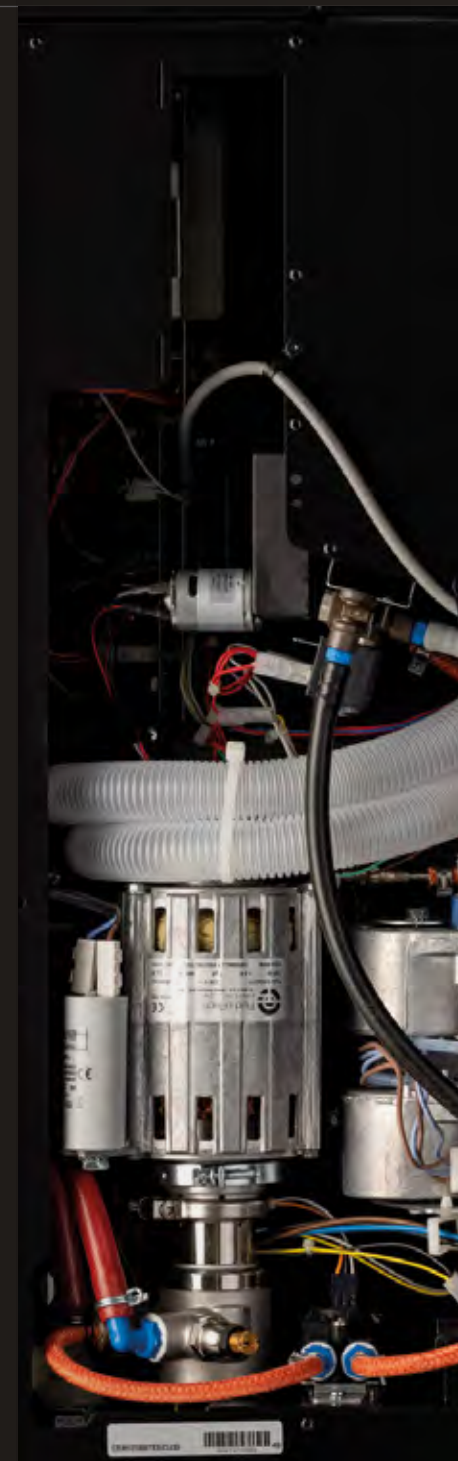

This coffee machine has the same quality components as the Espresso Medium, including the Braumann brewer and bean grinder. The big difference is capacity. The Large version has 3 instant containers for sugar, topping and chocolate, measuring a whopping 5.4 liters. In addition, the standard bean container can be enlarged by 1 or 2 kg. Extremely suitable if you pour a lot of coffee, cappuccino, etc. and don't want to keep refilling.

ETNA DORADO FRESH BREW AND BEAN TO BREW

FOR FILTER COFFEE LOVERS

TOUCH 7"

Filter coffee is making a comeback. The taste is widely appreciated because it is softer than that of high-pressure espresso coffee.

ETNA has two different types of fresh brew machines, each for a different coffee experience. Both machines use the Vendking Zuma brewing group, a feat of durable engineering as you would expect from us. Make filter coffee from ground coffee with the ETNA Dorado Fresh Brew Large. The ETNA Dorado Bean to Brew combines the smooth taste of the fresh brew brewing system, with the freshness of beans ground on site. The result is delicious fresh filter coffee.

Do your employees drink a lot of coffee and appreciate a smooth taste? Then either of these two coffee machines is a smart choice. Especially if you often brew coffee per pot instead of per cup, such as in healthcare, education or corporate settings.

○ ● ● THE SMOOTH COFFEE TASTE OF THE FRESH BREW BREWING SYSTEM

ETNA DORADO INSTANT COMPACT

COMBINES MAXIMUM SPEED WITH VARIETY

COMPACT TOUCH 7"

Instant coffee machines from the ETNA Dorado line combine a wide range of beverages with high brewing speed and easy maintenance. With the ETNA Dorado Instant, your guests or employees will have a delicious hot beverage of their choice within 8 seconds. And make several pots of coffee in 'no time'.

The ETNA Dorado instant compact is a small but versatile coffee machine that produces ten coffee variations based on instant coffee, chocolate, topping and, for example, sugar. Even when space is limited, you want to serve delicious coffee from a stylish machine. The ETNA Dorado Instant Compact was developed especially for this purpose. With its height of only 52 cm, this espresso machine fits perfectly in kitchens with upper cabinets.

Operation	7" SmartTouch
SmartSense	●
Stainless steel grates	accessory

Available in a
complete series

HXWXD	CAPACITY P/D	BREW SPEED
52 x 32 x 52 cm	75 - 150 cups	Approx. 12 sec. (120 ml)

ETNA DORADO INSTANT SMALL AND INSTANT MEDIUM

ENJOY FRESH COFFEE IN UNDER 8 SECONDS

Do your employees have short coffee breaks? Or do you run a sports canteen with peaks at halftime and the third half? With the ETNA Dorado Instant, your guests or employees will have a delicious hot beverage of their choice within 8 seconds. And make several pots of coffee in 'no time'. The quality is excellent and you don't have a bin to empty: this machine goes all day without effort.

The Small and Medium versions of the ETNA Dorado Instant don't differ much from each other. The main distinction lies in the control panel: the Small version has buttons, while the Medium version features a 7" SmartTouch screen.

The ETNA Dorado Instant Medium comes with larger standard containers compared to the ETNA Dorado Instant Small. Additionally, it can be expanded with a fourth container for even more variety. If you want to maximize your experience with the ETNA Dorado Instant Medium, you can opt for the High Capacity 6kW and a 12-liter boiler, allowing you to enjoy your favorite hot beverages even faster!

ETNA DORADO
INSTANT LARGE

ENJOY FRESH COFFEE IN UNDER 8 SECONDS

The ETNA Dorado Instant Large shares the same high-quality components as the ETNA Dorado Instant Small and Medium, including the boiler technology. The significant difference lies in its capacity. The ETNA Instant Large features 5 XXL containers, offering up to 28 popular coffee variations—making it our top choice among instant coffee machines. With this capacity, the machine is unique and perfectly suited for full operation, capable of brewing 900 cups of coffee without any intervention.

The ETNA Dorado Instant Large ensures that your guests or employees can enjoy a delicious hot beverage of their choice within 8 seconds. It can also quickly brew coffee in larger quantities. The quality is excellent, and you won't need to worry about emptying a waste bin—the machine effortlessly handles the entire day.

In addition to the wide selection of beverages, you can easily add milk and sugar or fill a coffee pot for meetings. The ETNA Dorado Instant Large is a popular choice in sports canteens, healthcare facilities, semi-horeca (hospitality), and businesses where speed matters.

ROADMAP

OUR ASSEMBLY IS 100% CO₂ NEUTRAL

In order to ensure 100% CO₂-neutral assembly, these 4 steps are taken continuously.

Of course, internal and external communication are an important part of this.

SUSTAINABILITY THEMES

ENVIRONMENT

CO₂-NEUTRAL

We are working on **constantly reducing** our CO₂ emissions. The amount we cannot reduce, we compensate from this year onwards by providing financial support to create **nature reserves** in the local region.

WASTE MANAGEMENT

We maintain separate waste streams and use **fully recyclable** packaging materials.

ENERGY LABEL A+

Our machines have the **highest achievable energy label**, according to the new classification.

SOCIAL

ENGAGEMENT

EMPLOYEES

Our employees can be sure of a **safe working environment**, both physically and socially.

REGION

We support several **local social initiatives**.

ORIGIN

75%

OF THE PARTS COME FROM EUROPE

75% of parts for our machines are assembled or produced within Europe.

CODE OF CONDUCT

We have agreed a **code of conduct** with our suppliers, in which we lay down agreements on environmental requirements, working conditions and child labour, among other things.

CIRCULARITY

REDUCE

ETNA machines are constructed from **high-quality materials**. During the design process, we think carefully about the amount of material we use and employ **recycled raw materials** as much as possible.

REPAIR

The service life of our machines is at least **8 years**. If necessary, the machines are easy to repair.

Parts will be available for at least **10 years** after purchase of the machine.

REUSE

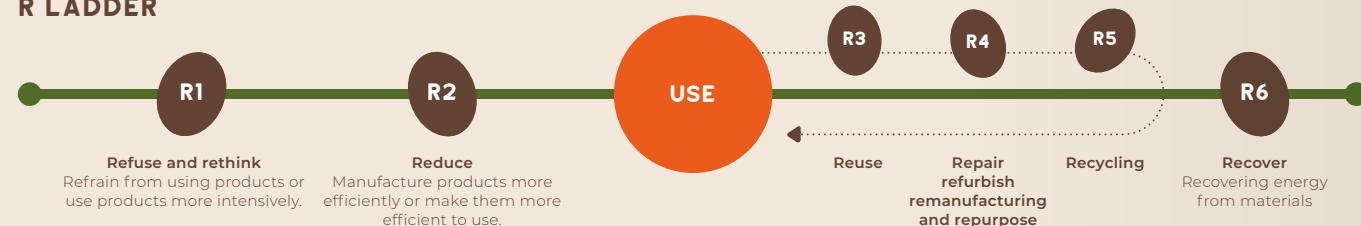

Our dealers are **trained** to maintain brewers so they last longer or can be reused.

RECYCLE

At least **95%** of our machines is recyclable.

Sagitta

Standalone

For many coffee drinkers, nothing beats a skilfully made cappuccino or latte macchiato. Prepared with fresh milk or the plant-based milk substitute of their choice. The demand for and variety of these specialty coffees have boomed in recent years. Your guests expect a lot of choice; your employees will appreciate it immensely. But properly frothing milk and milk substitutes is not easy.

With ETNA MilkBase, ETNA makes it easy for you: consistent quality milk foam at the touch of a button. Unique to the ETNA MilkBase series: they are self-contained machines. All the technology is in the frothing modules themselves and not in the coffee machine. For example, the ETNA MilkBase can be paired with the ETNA Sagitta, the ETNA Dorado Espresso Compact and Medium.

FEATURES ETNA MILKBASE

- **Temperature independent** – 2 high-end Flow Through Heaters keep the temperature completely under control for consistently perfect foam
- **Milk product independent*** – full or half full, made from soy, goat's milk or oats: as long as the product contains protein, the MilkBase will turn it into delicious froth
- **Pre-programmed recipes** – adjustable at will with 16 milk froth recipes. Pre-programmed: Latte Art, jug of milk froth, cappuccino and latte
- **Automatic cleaning (convenient with HACCP guidelines)** – fully automatic ETNA patented cleaning and rinsing system. Easy, quick cleaning

* For certain types of milk, such as oat milk, it is important to shake the packaging regularly during use.

CLEANING AND MAINTENANCE

A well-maintained machine **PROVIDES THE TASTIEST COFFEE**

Every coffee machine manufacturer, mechanic and dealer will agree. Good maintenance and proper cleaning is essential for the best coffee flavour and the durability of your machine. Moreover, with a (semi-)hospitality business, you must of course comply with the HACCP guideline. We understand that as a manager or owner, you want to put as little energy into that as possible. Therefore:

- We have made the daily cleaning of each machine as easy as possible
- You will find clear cleaning instructions on the inside of the door

ETNA MUNDO LINE

BECAUSE EVERYONE DESERVES GOOD COFFEE

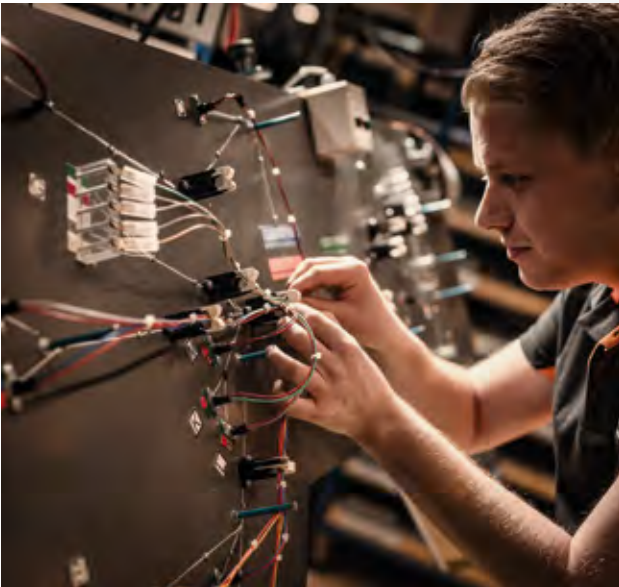

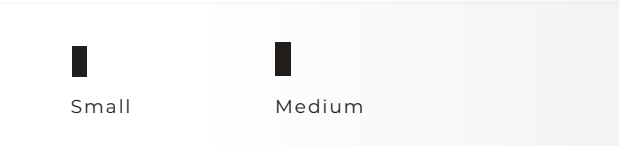

A nice cup of coffee is a cup of joy. ETNA wants to spread that joy to everyone. The ETNA Mundo line is our economy line: machines at a more competitive price. We can do that because we saved on features, options and appearance. After all, skimping on technology and quality is not an option in our company.

Are more luxurious features like a touch screen, cup sensors and dual coffee dispensing not important to you, but the price and reliability of the machine all the more? Then the ETNA Mundo line offers a solution.

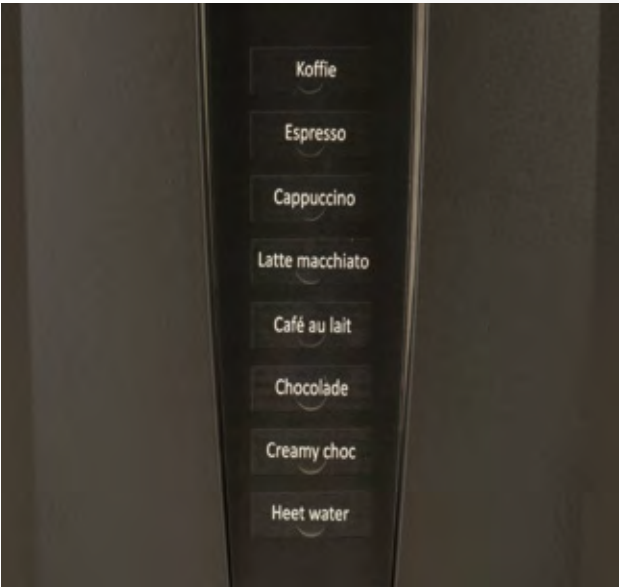

The ETNA Mundo line is available in 2 brewing systems: espresso with fresh beans and instant coffee.

○ ESPRESSO ○ INSTANT

The ETNA Mundo Espresso comes in Medium version. The ETNA Mundo Instant is available in Small version.

○ ● ● CUTTING BACK ON TECHNOLOGY IS NOT AN OPTION

○ ● ● BUTTONS OPERATION

○ ● ● FIRST A COFFEE BREAK, THEN ON TO BUSINESS: IT WORKS

ETNA MUNDO ESPRESSO MEDIUM

TOP QUALITY ESPRESSO IS THE FOUNDATION

Medium

A
balanced coffee
taste based on
freshly ground
beans

Freshly ground beans in the right grind, pure water at the right temperature and the perfect extraction technique. That's all you need for an authentic, powerful espresso, the basis for numerous coffee variations. ETNA guarantees that balanced taste, cup after cup, with the Braumann brewer. Also in our economy ETNA Mundo Espresso.

Do you need to prioritize? Then put taste and reliability first. The look of this machine and the amount of features, options and beverage variations (9) are more modest, but you will serve your employees or guests that delicious fresh coffee they can count on. The ETNA Mundo Espresso is available in a medium version, fitting for about 50 employees or about 250 hot drinks per day.

FEATURES ETNA MUNDO ESPRESSO MEDIUM

- **Brewing speed** – 8 seconds
Espresso brewing system – metal Braumann brewer and grinder with 8-years warranty
- **SmartFlow** - high-quality rotary pump with flow meter for optimal water pressure, a quiet machine and perfect in-cup quality
- **SmartLock** - Patented locking mechanism on bean container, no mess when removing the container
- **Easy operation** with buttons
- **Maximum dispenser height** 19 cm
- **Energy label A+**
- **Fully automatic cleaning program**

ETNA MUNDO INSTANT

INEXPENSIVE. FAST AND TASTY

Small

SMALL

Instant coffee is a smart choice if you want to serve your colleagues or guests delicious coffee, but need to do it quickly and inexpensively. In just 8 seconds, they have a flavourful coffee, cappuccino or chocolate. Where the number of choices increases with the capacity of the machine.

The ETNA Mundo Instant is available in Small, making this machine ideally suited for organisations from 20 to more than 50 employees. Sports canteens, healthcare facilities, semi-hospitality and other organisations where brewing speed and high numbers are important are very satisfied with this machine.

FEATURES ETNA MUNDO INSTANT

- **Brewing speed** – 8 seconds
- **Energy label A**
- **Maximum dispenser height** 14 cm
- **Easy operation** with buttons
- **Low maintenance** - due to lack of coffee residue
- **Fully automatic cleaning program**

ACCESSORIES

JUST AS YOU WANT IT

No company is the same. Therefore, ETNA coffee machines are available with different brewing systems, capacities and with interesting options. To fully meet your needs, we offer several additional accessories.

On this page we give an impression of our accessories, but this is by no means all of them. Do you have a different need or a special request? Please feel free to contact us.

CUP WARMERS

For preservation of temperature and flavour. Good coffee comes from good ingredients, the right brewing technique and the perfect temperature. A lot of heat and flavour is lost when coffee is brewed in cold coffee cups. Extend the ultimate taste experience for your employees or guests by serving it in a preheated cup.

- Our cup warmer is:
- made of stainless steel
 - available in ETNA Dorado Compact and Medium. And is also available in the ETNA Sagitta variant
 - the Medium variant has the two compartments that can be turned on and off

BASE CABINETS

A base cabinet is extremely functional due to its perfect size and storage space. They provide space for ingredients, sugar, milk and stirrers. Our Full Spec base cabinet also provides space for coffee cups. Did you choose a machine with cold water feature? Then we can install the water cooler in the base cabinet.

- suitable for the ETNA Sagitta, ETNA Dorado and ETNA Mundo line.

CONSOLES

You can use the consoles to increase the dispenser height of the machine by 10 centimetres. Useful if you need extra height to use the coffee pot feature.

- suitable for the ETNA Instant Small and Medium machines.

SIDE POD

Enhance the convenience and payment experience of your coffee machine with our high-quality side pod. This side pod offers seamless integration of any payment unit, from contactless cards to payment with cash or tokens, allowing your customers to enjoy their favourite coffee effortlessly.

- suitable for the ETNA Dorado coffee machines

OUR **NON-STOP** DRIVE

Reliable quality is a requirement at ETNA. Because we understand that delicious coffee is a prerequisite for your employees and guests. We contribute to that reliability every day. With solid craftsmanship, we develop our own technology. We listen to the needs of our dealers and end users and continue to innovate and perfect continuously. That drive has guided our development for over 165 years. And we continue forward.

CRAFTSMANSHIP SINCE **1856**

Our roots are in craftsmanship; ETNA began as an iron foundry in 1856. Listening to the market, we made a name for ourselves as a manufacturer of solid home appliances, eventually specialising in coffee machines for business use. Top quality at an affordable price. Even after purchase: our coffee machines are stable, have a long service life and vital parts are easy to replace. This ensures low maintenance costs.

Reduce, repair and reuse. An ETNA coffee machine is always the responsible choice. For the world and for your business. It's no coincidence that more and more independent dealers are choosing ETNA machines. Simply Unstoppable. That is our purpose and our promise. And we take those very seriously.

*Reduce
Repair
Reuse*

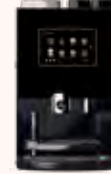

CUP AFTER CUP, **YEAR AFTER YEAR**

Meeting each other and gaining energy to get back at it. Coffee gives us that energy. At ETNA, we understand what a good cup of coffee means to people. Our engineers, technicians and developers dedicate themselves every day to making coffee machines that brew the perfect cup of coffee. Delicious coffee for your employees and guests.
